Mac地址关联平台账号

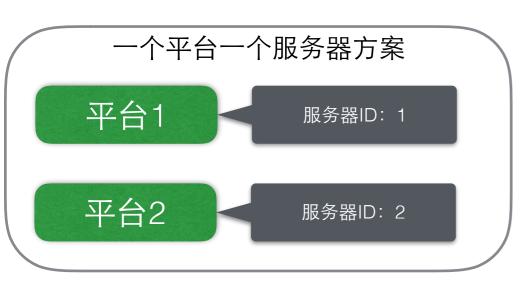

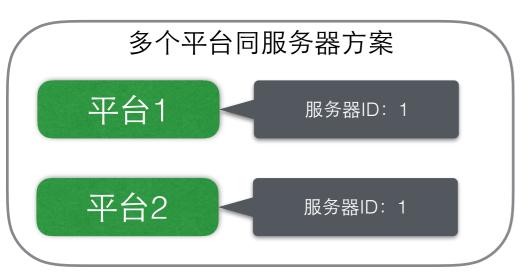

```
/** Mac地址账号 */
class MacAccount
{
    /** 平台账号列表 */
    publice List<PlatformAccount> platformList = new List<PlatformAccount>();
}

/** 平台账号 */
class PlatformAccount
{
    public string name;
}
```

平台分配服务器ID编号

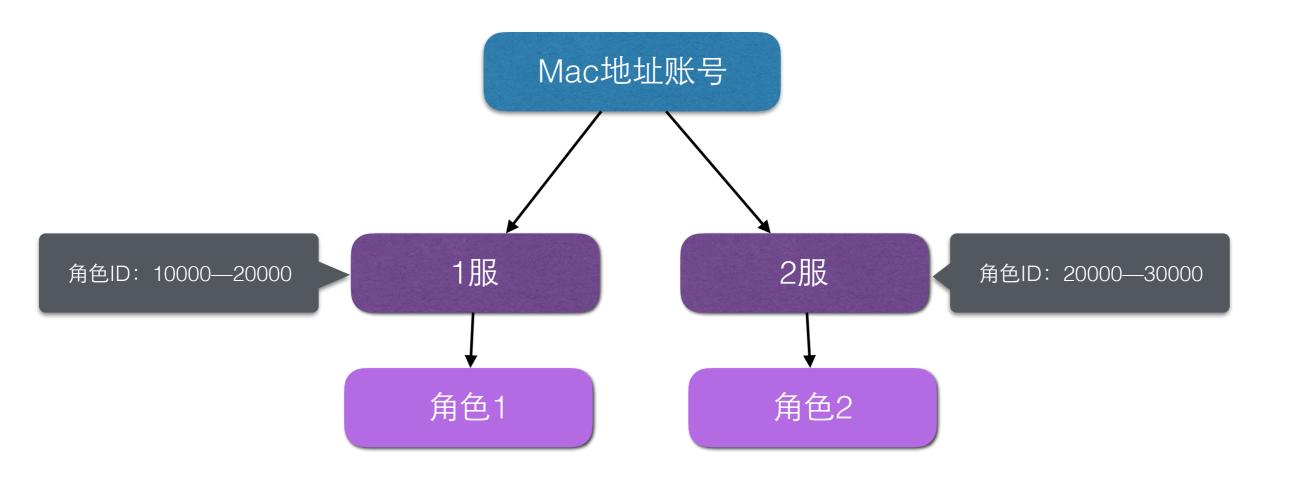

```
// 平台最多分配多少个服务器
const int PlatfromServerMaxCount = 100;

//分配服务器编号
// platformId 平台ID
// platformServerIndex 平台服务器索引 (1–99)
int GetServerID(int platformId, int platformServerIndex)
{
    return platformId * PlatfromServerMaxCount + platformServerIndex;
}
```

Mac地址和角色的关系

角色ID分配: ServerID * ServerRoleMaxCount —— (ServerID + 1) * ServerRoleMaxCount;
